

The Rebuild India Fund is an initiative launched by Dasra and Tarsadia Foundation that provides long-term, flexible funding and capacity-building support to community-based organizations (CBO) and proximate leaders - who belong to and work closely with the most vulnerable and marginalized communities across India.

Rebuild first evolved out of Dasra's Covid relief campaign, #BacktheFrontline, which launched in April 2021, in response to the peak of the Covid pandemic's second wave in India. We have shaped Rebuild as a 'community of communities', a growing, power-sharing, open-source multi-stakeholder platform creating path-breaking trust between funders, proximate leaders and vulnerable communities.

Inside is a look at our current coverage with 140+ CBO partners selected through recommendations by 40+ non-profit networks and stakeholders.
